

IN2ITION SOLID

Staying One Step Ahead Of The Competition!

We've done it again! The In2ition Solid features the X-Type Core found in the original In2ition. This time we've wrapped it with our Prime ET Solid cover, first featured on the Paradox Red. The combination of the two keeps the motion bowlers loved in the original In2ition, but with more of it throughout the entire lane.

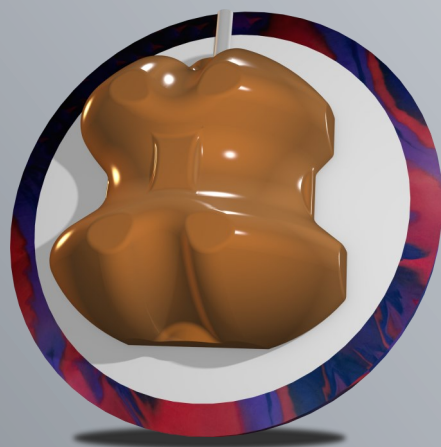

PRIME ET (Extra Traction) SOLID

Prime ET (Extra Traction) is the latest version of our successful Prime coverstock.

We tasked our chemists to develop a high performance cover which would create extra traction in the midlane without sacrificing backend.

To achieve this, they created a new traction enhancing additive that modified the peaks and valleys of our Prime coverstock.

The end result is Prime ET Solid.

X-TYPE

The concept behind the X-Type core was to create a low RG, asymmetric design unlike any other. Typical low RG designs create instability through the front part of the lane, allowing the ball to rev up easily. This creates a strong read of the midlane and a smooth transition at the backend due to the core becoming stable as it transitions through the backend.

By separating mass spatially along the pin axis, we created higher RG characteristics, while maintaining the balls low RG design intent. Doing so creates a constant state of mild core instability throughout the entire lane, enhancing the In2ition Solid's reaction at the backend.

IN2ITION SOLID

Staying One Step ahead of the Competition!

PART NUMBER: TMIN2SLDxx

WWID: 19 December 2019

WWRD: 21 January 2020

WEIGHTS: 12-16lb

CORE: X-TYPE

COVER: PRIME ET SOLID

COLOR: PURPLE/DARK BLUE/RED

FINISH: 500/1000 ABRALON™

LANE CONDITION: HEAVY OIL

REACTION: STRONG MIDLANE & BACKEND

CORE: BY THE NUMBERS

WEIGHT	RG	DIFF	MB
16 LBS	2.50	0.047	0.013
15 LBS	2.48	0.054	0.015
14 LBS	2.50	0.054	0.015
13 LBS	2.55	0.045	0.013
12 LBS	2.60	0.037	0.011

RECOMMENDED CLEANER:
Powerhouse Clean N' Dull
